TIA: WOMEN'S HEALTH CLINIC

VISION

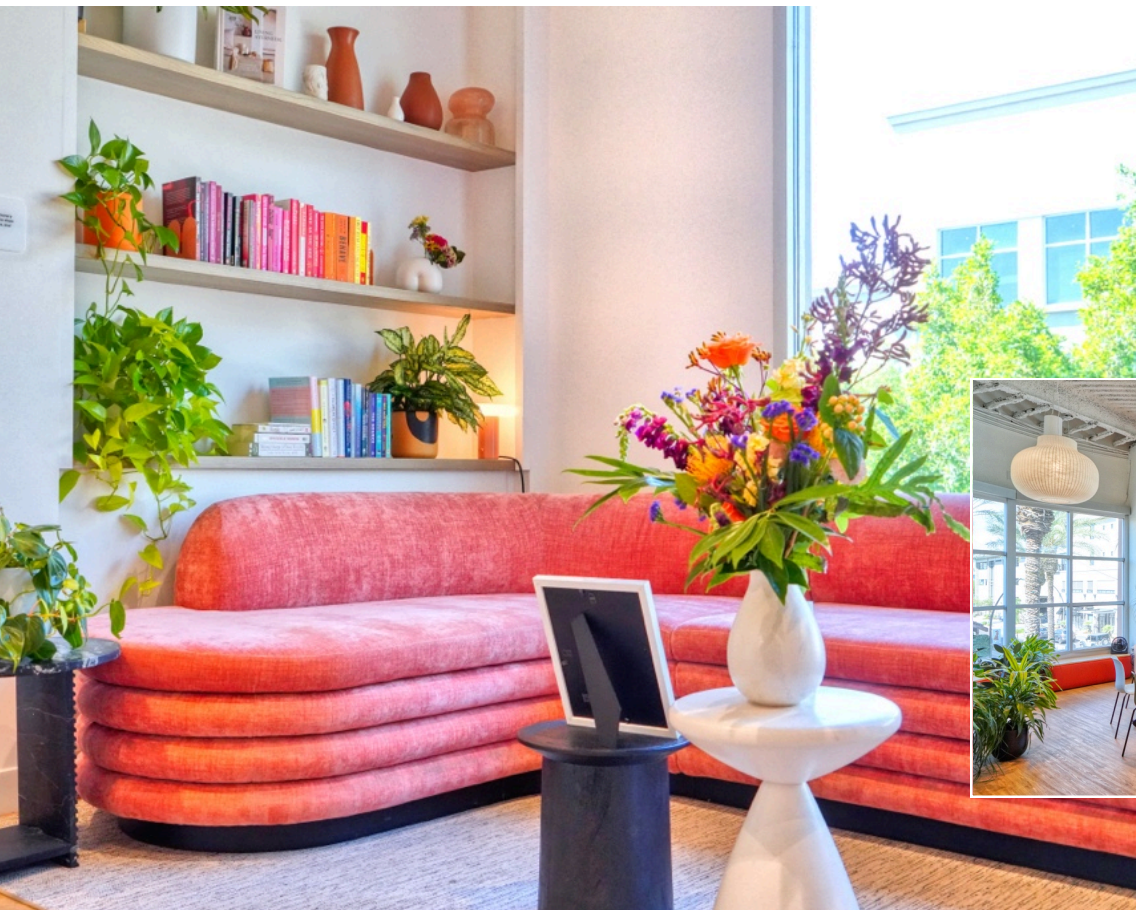

Tia approached us with significant challenges related to the typically sterile, uncomfortable, anxiety-inducing atmosphere of healthcare settings. They sought an experiential environment that embodied their holistic approach to women's health, treating the whole self.

Our strategic approach focused on creating a sanctuary for healing by infusing elements of nature throughout the clinic. Collaborating closely with the clinic's team of designers, we developed a comprehensive design plan aimed at transforming the space into a home-like ambiance that defies the typical healthcare setting. We envisioned a place where women could feel safe, nurtured, and rejuvenated.

To achieve this, we brought nature indoors with tropical plants, creating a serene atmosphere. This award-winning design reduces stress, promotes relaxation, and fosters well-being, ultimately redefining the patient experience to be warm, and conducive to healing.

In collaboration with our clients, we created...

- > revitalized vibrant front desk filled with tropical energy creating an inviting first impression.
- > waiting room styled carefully with hand-selected plants to simulate the mood of a trendy, cozy home.
- > patient rooms enhanced with a single, tastefully-placed plant to maintain balance in a simple yet tranquil setting.
- > plant-filled restorative space for staff to provide a retreat for breaks and foster an uplifting collaborative atmosphere for meetings.

"The most exciting part of this design journey is witnessing a clinic like Tia embrace the transformative power of plants, understanding that nature-driven environments profoundly impact healing and well-being in the health industry." – Joe Zazzera Designer and Co-owner
